DETAILED ACTION***Claim Numbering***

This application was filed without a claim numbered "36". Under 37 CFR §1.126, **claims "37 – 60" have been re-numbered as claims 36 – 59**, respectively, with a corresponding change in the claim dependencies. Thus, claims 1, 17, 32, 42, 50, 52, 54, and 58 are the independent claims. It is requested that Applicants make a the same change in their filewrapper. Kindly use these claim numbers in responding to this Office action.

Election/Restrictions

This application contains claims drawn to a multitude of patentably distinct species with no truly generic or linking claim present. Obviously, search and examination of *all* of the species (in-band achromatic behavior, polarization insensitivity, degree of retardation, multiple band behavior alone or in combination with a bias element, use of o-plates or a-plates, *etc.*), would represent a serious burden. However, rather than requiring election of a *single* disclosed species, the examiner requests that Applicants elect from what appear to be two independent inventions, generally represented by "Case 1" behavior and "Case 2" behavior described in connection with Table 1.

In the most general respect, this application contains claims drawn to a phase retarder/polarization rotator (or operation), alone or in combination with least one light splitter (or operation). However, the retarder/rotators *as claimed* at differ in their effects:

Art Unit: 2872

Group I - claims 1 – 16 and 32 – 41, drawn to pure polarization rotation of at least one spectral band (without compound or residual retardation), classified in class 359, subclass 494; and

Group II - claims 17 – 31 and 42 – 49, drawn to half-wave rotation of at least two spectral bands with polarization reflection properties (offset optical axis), classified in class 359, subclass 498.

Claims 50 – 59 are drawn to a broader recitation of the combination can be grouped with either Group I or Group II.

However, Group I (and claims 50 – 59) contains claims generic to the following patentably distinct beam splitting operations:

Species Ia – at least one beam splitter with a polarizing effect, claims 10, 14, 15, 37, 51, 53, and 57;

Species Ib – beam splitter with a wavelength selective effect, claims 11 and 38; and

Species Ic – half-silvered mirror beam splitter, claim 12.

Similarly, Group II (and claims 50 – 59) contains claims generic to the following patentably distinct beam splitting operations:

Species IIa – at least one beam splitter with a polarizing effect, claims 22, 27, 45, 51, 53, and 57;

Species IIb – beam splitter with a wavelength selective effect, claims 23 and 46; and

Species IIc - half-silvered mirror beam splitter, claim 24.

Art Unit: 2872

Applicant is required under 35 U.S.C. 121 to elect one of the independent inventions and a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

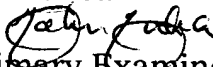

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Juba whose telephone number is (703) 308-4812. The examiner can normally be reached on Mon.-Fri. 9 - 5.
